COMPANY OVERVIEW

Ai Tech Intel, Inc.

Who We Are

Ai Tech Intel, Inc. is an applied AI infrastructure company. We design, own, and operate a portfolio of AI-native platforms across physical commodities, enterprise orchestration, workforce systems, regulated compliance, creator technology, and professional education.

Our standard for every product, partnership, and platform is plainly stated: **For the Betterment of Humanity.** Mission is written into governance — not bolted on as marketing.

Investor inquiries	investors@aitechintel.com (via aitechintel.com/investors)
Data Room	aitechintel.com/investors/data-room (manually approved)

What We Build

Ai Tech Intel operates a portfolio of owned platforms rather than a single product. Each platform addresses a defensible category where applied AI changes the cost structure, trust model, or operating tempo of an entire industry.

Platform	Category	Status
Commodexia™	Physical commodity deal intelligence	Available Now
AiC3™	AI command, control & coordination	In Development
T.E.A.M.S.™	AI-augmented workforce operating system	Request Early Access
TeaVib™	Creator & content technology	Join Waitlist
PCN™	Property compliance network	Request Information
Ai Tech Intel Academy™	Professional AI education	Join Waitlist

How We Operate

Owned, not outsourced. Every platform is built on infrastructure we operate. We are not a services firm reselling third-party AI.

- Applied AI focus — every platform is shipped, not theorized.
- Capital-efficient build — investment goes to engineering, distribution, and category-defining infrastructure, not slideware.
- Status transparency — every platform shows its real launch state on the public site.
- Mission-bound — "For the Betterment of Humanity" is the standard, not a slogan.

How We Generate Value

Revenue is structured by platform category — transaction take rates on commodity deals, enterprise SaaS for AiC3 and T.E.A.M.S., subscription and credentialing for Academy, network access for PCN, and creator-economy monetization for TeaVib. Detailed unit economics are reserved for the Investor Data Room.

Who We Build For

- Operators in regulated industries adopting AI under real scrutiny.
- Public-sector and institutional buyers needing auditable AI systems.
- Enterprises standardizing on AI command-and-control.
- Workforces being reorganized around AI-augmented operations.
- Individuals and institutions training the next decade of AI talent.

Where We're Going

Ai Tech Intel is positioned as an enduring American AI infrastructure company. Near-term: deepen Commodexia revenue, advance AiC3 toward general availability, open Academy and T.E.A.M.S. cohorts, and complete PCN tenant pilots. Medium-term: institutional capital partnerships, expansion into adjacent regulated categories, and ecosystem-wide integrations across the platform portfolio.
