

Building the Intelligence Infrastructure of Tomorrow™

AI infrastructure for Enterprise, Government, Education, Public Safety, Commerce,
and the Creator Economy.

INVESTOR PACKET

Executive Summary · Confidential

For the Betterment of Humanity™

● EXECUTIVE SUMMARY

An intelligence infrastructure company building the foundation for the AI economy.

Ai Tech Intel, Inc. designs, owns, and operates a portfolio of AI platforms serving enterprise, government, education, public safety, commerce, and the creator economy.

MISSION

Build the intelligence infrastructure that connects people, organizations, AI systems, and industries — for the betterment of humanity.

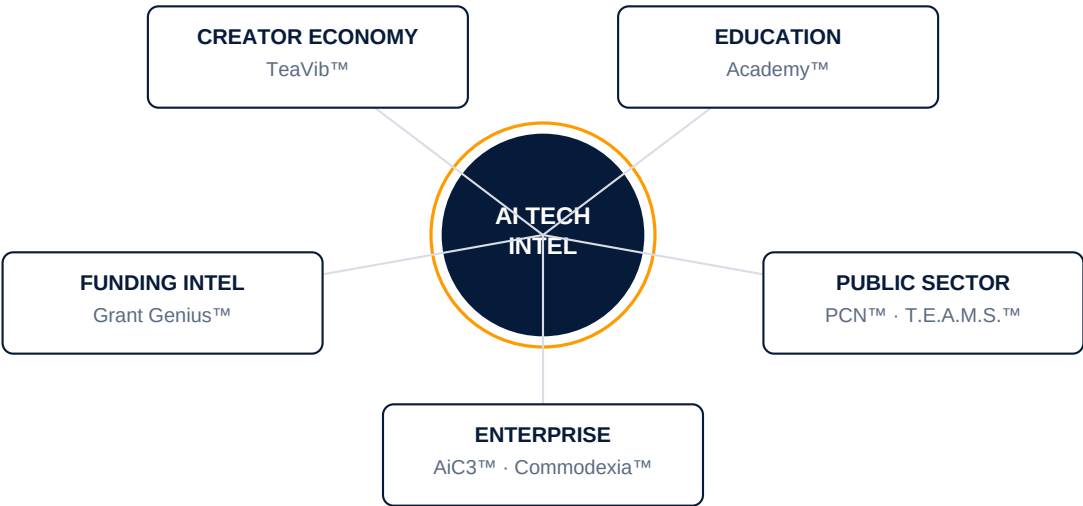

VISION

A world where every institution — public or private — operates on intelligent, interoperable infrastructure rather than fragmented point tools.

WHAT MAKES US DIFFERENT

We don't sell another chatbot. We build owned, multi-tenant platforms across distinct markets, unified by one operating system: AiC3™.

THE ECOSYSTEM AT A GLANCE

● WHY AI TECH INTEL

Enterprises and governments don't have an AI problem. They have a fragmentation problem.

THE PROBLEM

Most organizations are buying disconnected AI tools — one for chat, one for analytics, one for compliance, one for content — with no shared intelligence, no shared identity, no shared data, and no shared accountability.

The result is duplicated cost, security exposure, and AI that never compounds in value. Procurement scales. Capability does not.

THE SOLUTION

Ai Tech Intel builds the intelligence infrastructure that connects people, organizations, AI systems, and industries — under one operating layer, AiC3™, with purpose-built platforms for each market we serve.

One company. One operating system. A growing portfolio of category-defining platforms.

ONE OPERATING SYSTEM

AiC3™ routes AI providers, learns from human feedback, and powers every platform we own.

MULTIPLE MARKETS

Enterprise, public sector, education, creator, and funding — diversified revenue from day one.

OWNED INFRASTRUCTURE

Multi-tenant, provider-agnostic, government-ready. Built to be owned, not rented.

● THE ECOSYSTEM

One parent company. Six platforms. Five markets. Unified by AiC3™.

ENTERPRISE AI		
AiC3™ <i>Enterprise · Internal Ops</i>	The operating system behind Ai Tech Intel — provider routing, learning, content, publishing, monetization.	Advanced Development
Commodexia™ <i>Commodity Buyers & Sellers</i>	AI-driven platform for physical commodity deals — sourcing, verification, and transaction support.	Available Now
PUBLIC SECTOR		
PCN™ <i>Municipal Government</i>	Multi-tenant property compliance network for municipalities — own-branded dashboards per jurisdiction.	Production Pilot
T.E.A.M.S.™ <i>Public Safety Agencies</i>	AI workforce and operations infrastructure for public safety, emergency response, and field teams.	In Development
EDUCATION & WORKFORCE		
Ai Tech Intel Academy™ <i>Learners · Employers</i>	Training, certifications, and applied AI curriculum for the workforce of the AI economy.	Join Waitlist
CREATOR ECONOMY		
TeaVib™ <i>Creators & Audiences</i>	Creator and audience platform connecting content, commerce, and AI-assisted production.	Join Waitlist
FUNDING INTELLIGENCE		
Grant Genius™ <i>Grant Seekers</i>	AI-assisted grant discovery, drafting, and compliance for nonprofits, agencies, and small business.	Production Ready

● MARKET OPPORTUNITY

Seven institutional-scale markets — diversified, durable, and increasingly AI-native.

01 Enterprise AI
Operating systems & internal ops

02 Municipal Technology
Compliance · permits · citizen services

03 Public Safety
Field ops · dispatch · agency workflow

04 Education
AI workforce skilling & certification

05 Creator Economy
Production · publishing · monetization

06 Commodity Commerce
Physical-asset transaction infrastructure

07 Grant Intelligence
Funding discovery & compliance

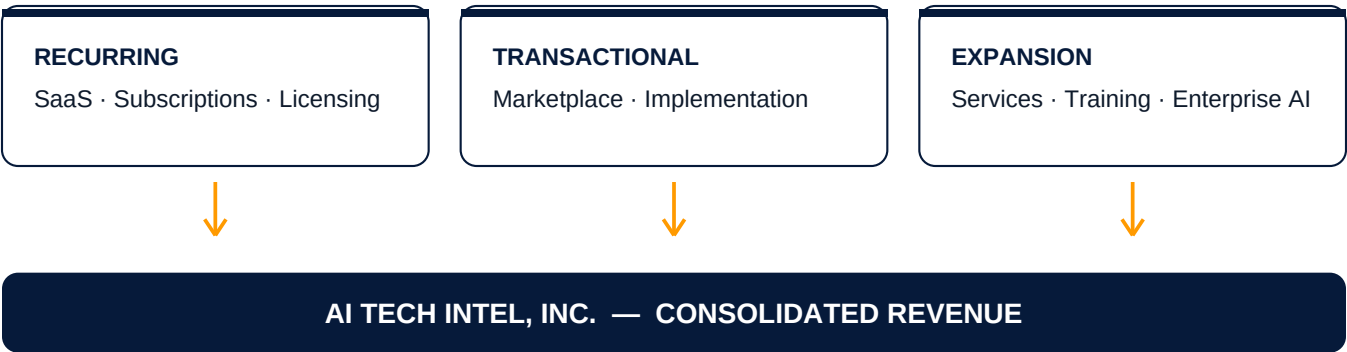

Every market we serve is undergoing the same shift: from point tools to intelligent infrastructure. We are building the layer that shift runs on.

● BUSINESS MODEL

Multiple recurring and high-margin revenue streams across the portfolio.

REVENUE FLOW

● COMPETITIVE ADVANTAGE

Why Ai Tech Intel is structurally defensible in the AI infrastructure layer.

Multi-Platform Ecosystem

Six owned platforms across five markets — diversified revenue, shared cost base.

Shared Intelligence

Every platform feeds AiC3™. Learning compounds across the portfolio.

Provider-Agnostic AI

Route to the best AI provider per task. Never locked to one model vendor.

Multi-Tenant Architecture

Built once. Deployed for many. Each customer gets its own branded surface.

Government-Ready

Designed for the compliance, procurement, and security posture public agencies require.

Enterprise-Ready

SSO, audit, data isolation, and admin controls — engineered in, not bolted on.

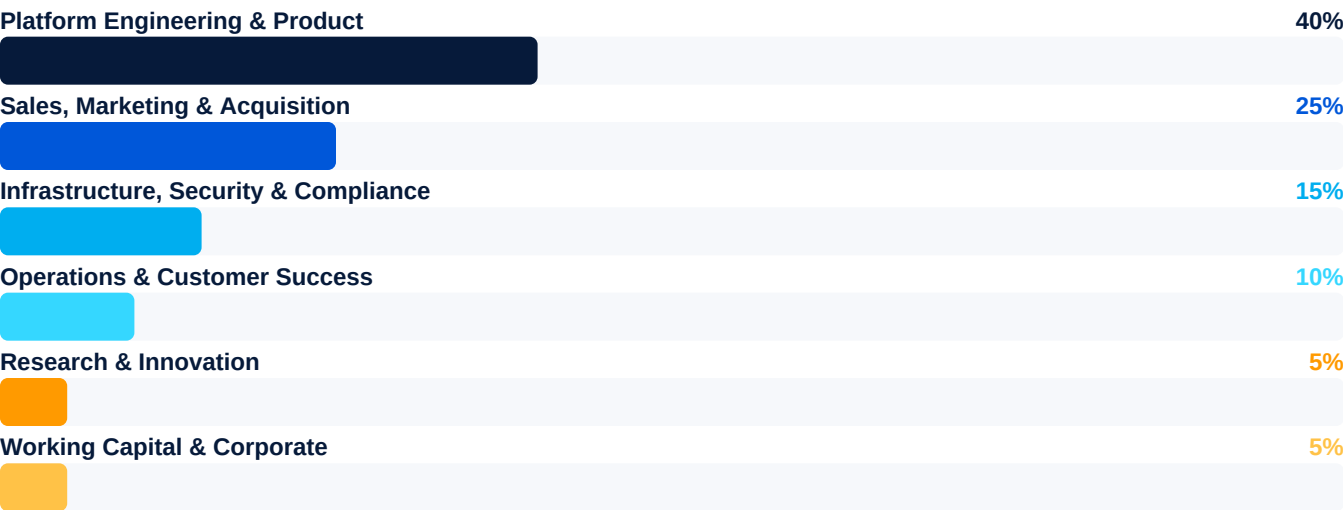

Mission-Driven

“For the Betterment of Humanity.” Mission is written into governance.

● USE OF INVESTMENT CAPITAL

Capital deployed to accelerate platform commercialization and ecosystem-wide growth.

Ai Tech Intel is conducting a Regulation D offering initially targeting approximately \$10M, with capacity to expand to \$25M. The investment is in Ai Tech Intel, Inc. as a whole — strengthening the ecosystem, not a single product.

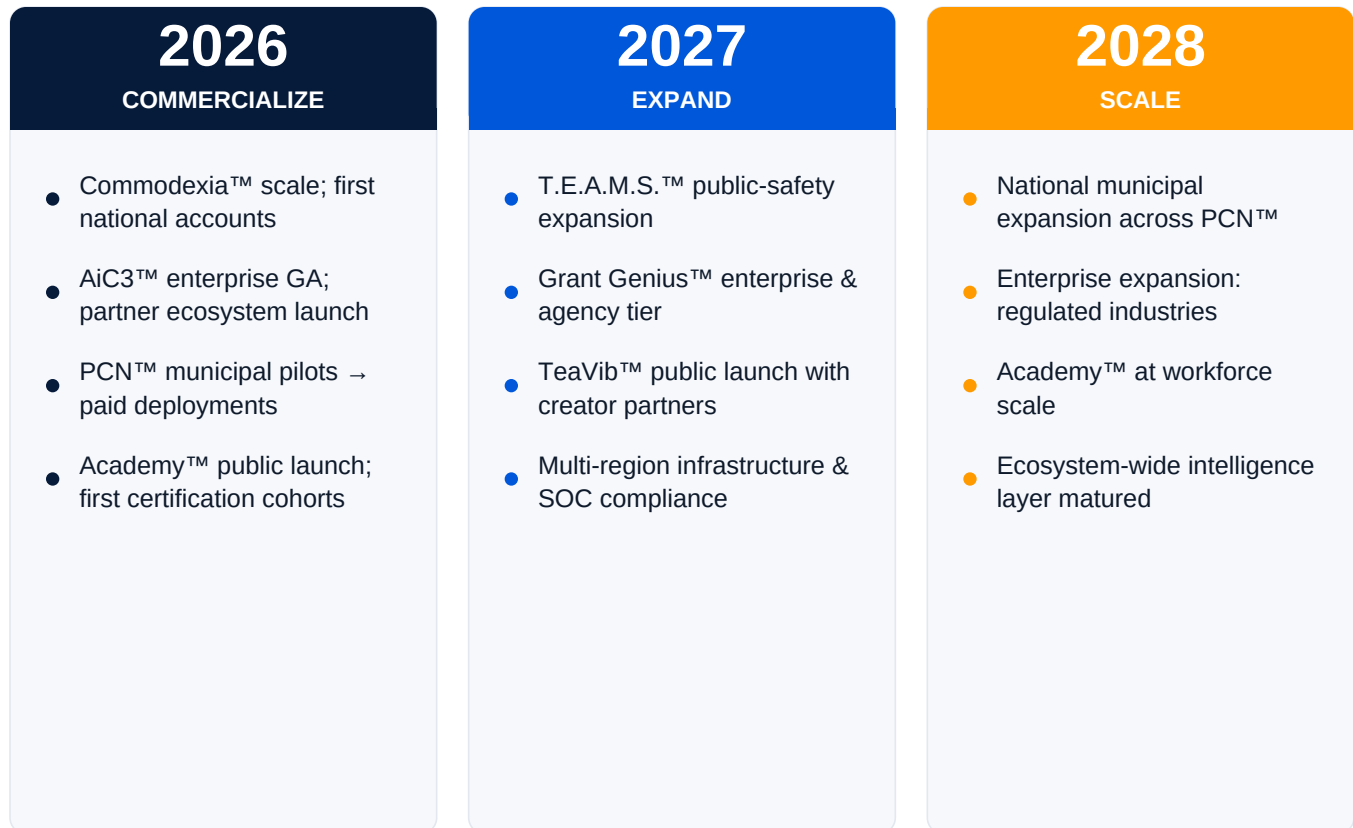

PURPOSE OF FUNDS

40% — Platform Engineering & Product Complete and scale AiC3™, Commodexia™, PCN™, T.E.A.M.S.™, Grant Genius™, TeaVib™, and Academy™.	25% — Sales, Marketing & Acquisition National enterprise sales, municipal outreach, partnerships, and customer acquisition.
15% — Infrastructure, Security & Compliance Cloud capacity, cybersecurity, compliance, monitoring, and AI governance.	10% — Operations & Customer Success Implementation, onboarding, customer success, and enterprise support.
5% — Research & Innovation Next-gen AI capabilities, robotics integration, quantum-ready initiatives, and future platforms.	5% — Working Capital & Corporate Legal, accounting, insurance, general operating expenses, and strategic flexibility.

Capital raised will be deployed to accelerate platform commercialization, expand enterprise and municipal sales, strengthen technology infrastructure, and support the long-term growth of Ai Tech Intel's multi-platform ecosystem.

 ROADMAP

A three-year arc from platform commercialization to national scale.

Each year compounds: today's platforms become tomorrow's distribution. Every customer added strengthens the intelligence the next customer inherits.

CLOSING

The Future Will Be Built on Intelligence Infrastructure.

Ai Tech Intel, Inc. is positioned to be one of the companies that builds it. We own the platforms. We own the operating system. We own the relationships with the markets we serve. Capital partners who join now are investing in the foundation of the next decade of intelligent operations — for enterprise, government, education, public safety, commerce, and the creator economy.
