PLATFORM EXECUTIVE SUMMARY · REQUEST EARLY ACCESS

T.E.A.M.S.™

Executive Summary

T.E.A.M.S.™ is an operating system for AI-augmented teams. Workflows, decisions, and documentation are captured in one continuous fabric — making AI a first-class teammate inside the operating cadence of an organization rather than an isolated tool.

Category & Positioning

Category: AI Workforce Operating System

Market Opportunity

Every organization adopting AI faces the same problem: AI is everywhere, but accountability for AI-assisted work is nowhere. T.E.A.M.S. addresses the operations and management layer that general-purpose AI tools do not.

Customer Profile

Operations leaders, COOs, workforce program owners, and AI-transformation teams.

Revenue Model

- Per-seat subscription with tiered functionality.
- Enterprise deployments with administration, audit, and integration packs.
- Onboarding and change-management engagements.

Competitive Advantage

- AI-native from inception — not retrofitted into a legacy productivity tool.
- Captures the operating fabric, not just chat transcripts.
- Compounds value as more of the organization's work is captured.

Development Status

In active development. Early-access cohort forming.

Roadmap

- Open early-access cohort with anchor operators.
- Release administration, audit, and integration packs.
- General availability across enterprise and public-sector workflows.

Place in the Ai Tech Intel Ecosystem

Every Ai Tech Intel platform is built to operate on shared infrastructure and to compound the value of the broader portfolio. AiC3™ is the foundational orchestration layer; Commodexia™, T.E.A.M.S.™, TeaVib™, PCN™, and Academy™ are independent revenue lines that benefit from — and reinforce — that foundation.
