TeaVib™

Executive Summary

TeaVib™ is AI-native content tooling and a creator ecosystem designed for premium, brand-safe production at scale. It treats creators as the production line, not the product — and treats brand safety, rights, and attribution as defaults.

Category & Positioning

Category: Creator & Content Technology

Market Opportunity

Creator and brand-safe content production is the fastest-growing segment of digital media. AI has accelerated production but also fractured trust. TeaVib targets the premium tier where brands and creators both demand provenance, quality, and pace.

Customer Profile

Creators, brands, agencies, and media operators producing at premium scale.

Revenue Model

- Creator and brand subscriptions with tiered tooling.
- Marketplace take-rate on connected creator/brand engagements.
- Enterprise content infrastructure agreements.

Competitive Advantage

- Premium production focus — not the lowest-common-denominator AI feed.
- Brand-safety and rights infrastructure as a default.
- Network effects across creators, brands, and connected platforms.

Development Status

Pre-launch. Waitlist open for creators and brand partners.

Roadmap

- Closed creator cohort and brand-partner pilots.
- Open marketplace and tooling tiers.
- Enterprise content-infrastructure packages.

Place in the Ai Tech Intel Ecosystem

Every Ai Tech Intel platform is built to operate on shared infrastructure and to compound the value of the broader portfolio. AiC3™ is the foundational orchestration layer; Commodexia™, T.E.A.M.S.™, TeaVib™, PCN™, and Academy™ are independent revenue lines that benefit from — and reinforce — that foundation.
